Notes

Thanks - I wish to thank the following people for their help in this project.

Russell "Rusty" Fay. The work that Rusty has put into this cemetery is immeasurable. It was his work that formed the basis for this database. Over the course of time Rusty recorded all the names, dates, and other information that is recorded on the grave stones in the cemetery. This would be over 1000 stones. This information was recorded in a large book, all hand written. There is also a book with many of the newer plots. Listing the owner, where people are buried on the plots, etc. Once more all hand written. Then there are the hand drawn maps. Each section has its own small map, then there are the larger maps that incorporate the different sections. As sexton I cannot begin to tell you how invaluable the maps and this information is. I also cannot convey to you the help these records were in putting this database together. I cannot thank Rusty enough for the work and love that he has given to the Milford Center Cemetery.

Dr. and Mrs. Heiland. Scott and Susan have photographed and listed the majority of the graves in Milford Center Cemetery on Find -a-Grave. This was very helpful when cross referencing information found in Rusty's book and the cemetery's records. They have also added a lot of other information, such as photos of obituaries, transcribing information found in old newspaper articles etc. Susan has also passed along helpful information along the way. May I also say that Scott and Susan have done this work for many other cemeteries in the area, including Milford Cemetery and Pine Grove Cemetery in Portlandville, along with many other smaller cemeteries. Just to give you a sense of their efforts in this endeavor, Susan and Scott have added over 12,500 memorials to Find-a-Grave. They have added over 31,000 photos. I know I speak for many in thanking them for their efforts.

My daughter Bethany Gorence. Beth laid the foundation for this database. She transcribed all the names and dates found in the cemetery records and in the book Rusty prepared, into an excel file. This consisted of well over 1000 names that had to be typed in.

I know that I would never have had attempted this project of seeking to list all those interred and thought to be interred in the Milford Center Cemetery without the help of these people. I am truly grateful how each one made the project easier. Stephen D. Fournier - Sexton - Milford Center Cemetery - April 2020.

Methodology - In striving for accuracy of the information that is contained in this database several references were used to cross reference information. These include, though may not be limited to, the following;

The books prepared by Rusty Fay as mentioned above. This was coupled with many personal conversations that I had with Rusty.

Milford Center Cemetery book of internments (cemetery records).

<https://www.findagrave.com/>

<https://billiongraves.com/>

<https://www.deathindexes.com/newyork/> - Online New York Death record index

<https://www.familysearch.org/search/> - Family Search is a great site and it is free.

<https://www.ancestrylibrary.com/> - This was used through the Four County Library system

<https://fultonhistory.com/Fulton.html> - great site to search old newspapers. Take the time to learn how to use the search engine, it will be worth it.

<https://nyshistoricnewspapers.org/> - Another great site for researching old newspapers.

The History and Genealogy of the Ancestors and Some Descendants of Stukely Westcott

By Roscoe L. Whitman - 1932 This work can be found here -

<https://babel.hathitrust.org/cgi/pt?id=wu.89066127960&view=1up&seq=7>

One should use caution using this as a historical reference. While there is a lot of information about the Westcotts, as well as other Milford families, Whitman is not always accurate in the information provided. For example, he states that the Milford Center Cemetery “embraced ten acres of land donated by Joseph Mumford, son of the first settler, Thomas,…” There are no records that indicate that the cemetery was ever 10 acres, (it is currently approximately 6.6 acres). Also, according to other sources it was Thomas Mumford who first donated the land for a public “burial ground”. In reading Mr. Whitman’s book it is clear that he uses orally transmitted information that is not always accurate.

NYSHA Research Library at the Fenimore Museum

Local funeral home records

Many hours spent in the cemetery itself.

Miscellaneous Notes -

I have noticed that there are people listed on find-a-grave website that we have no record of burial. Nor is there any indication, (stone, marker, obituaries, etc) that they are in fact interred in the Milford Center Cemetery. These individuals are not recorded on this list.

There is reference to a "Tillapaugh Plot". George Tillapaugh, who owned and operated Tillapaugh Funeral Home purchased many plots in area cemeteries. Mr. Tillapaugh used these plots to inter infants who died after birth or were still born, for family who could not afford a burial. He also used them to give a proper burial to indigent people. We are aware of the general area of these plots but are not sure of the exact location.

Some of the birth years are approximate.

* next to name denotes a veteran

On occasion the name on the tomb stone is spelled differently from census or other records. (i.e. Hungerford on census records as well as Newspaper article, and Hungford on stone)

On occasion the dates of the stones do not match other records. When it came to death dates I always went with the New York State death index dates.

There are several names listed in the Milford Center Cemetery book of internments that are not interred in this cemetery. I do not know why they are written in the book. Most of these date from the late 1800s. There are "gaps" in the records as well. Recorded burials from the early 1900s are incomplete. There are no records of burials prior to 1883. The earliest record of burial we have is February 13, 1883 for Edith Potter. Where exactly she is interred is unknown.

There are a few tomb stones with names of people who are not interred here. Many times they will not have a death date on the stone, yet some do. An example of this is Elijah Dingman. Elijah was a young man killed in action during the Civil War in the Battle of Cedar Creek, in Cedar Creek Virginia. While his birth and death dates are on the family stone, Elijah was interred in the Winchester National Cemetery (Union Cemetery), in Winchester City, Virginia.

There are many people interred in the cemetery that have no stones. There are two main reasons for this. First the passage of time has taken its toll on the stones and they no longer exist. It is clear from the contour of the ground in certain places that there are folks buried underneath, but the stones are long gone. The second main reason is that the people were too poor to afford a stone, or had no family. A good example of this is Ezra Stevens. Ezra was a well respected man in his day who lived into his 90s. He died at age 92 spending his last years at the Otsego County farm, which was also called the "almshouse" or the poor house. An article in the Freemans Journal states that he is buried in the Milford Center Cemetery. His wife's and sister's graves are marked with a stone, but his is not.

In my research of old newspapers I have come across names of many people who are reported to have been interred in the Milford Center Cemetery. The exact location of a number of these is unknown.

In the plot column you will notice a reference to “(DAR)” This denotes a survey done by the Oneonta Chapter of the New York State Daughters of the American Revolution. The survey was of the old part of the cemetery done around circa 1935. There are 8 names that are listed on this survey that are not found in any record of the cemetery. These stones were obviously there in 1935 but have since become victims of time. These names are included in the list. We know that they were buried in the old section, (sections F & G) but plots are unknown. There is also many discrepancies regarding dates. There are clearly errors in the survey as most of the stones are still there and some show dates that differ from the survey. These were noted where possible.
